PUBLIC HEALTH REPORTS.

[1903.—Department Circular No. 111.]

Geographic distribution of yellow-fever mosquitoes, and the importance of accurate knowledge concerning all mosquitoes of the United States.

TREASURY DEPARTMENT,
BUREAU OF PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE,
Washington, September 30, 1903.

To medical officers of the Public Health and Marine-Hospital Service, State and local health and quarantine officers, and others concerned: At the First International Sanitary Convention, held in Washington December 2 to December 5, 1902, it was resolved—

That the different governments study, in their respective territories, the geographical distribution of the mosquito of the genus *Stegomyia*, in order that said study may have practical application in subsequent conventions.

In addition to information as to the yellow-fever mosquito (Stegomyia fasciata), the desirability of exact knowledge concerning all of the mosquitoes of the United States is apparent.

It is desired that every effort be made to collect specimens of mosquitoes in your vicinity and to have them transmitted, with notes on the accompanying blank form, under franked envelope, to this Bureau. They will be transmitted by the Bureau to Dr. L. O. Howard, Chief Entomologist of the United States Department of Agriculture, and recently appointed consulting entomologist of the Public Health and Marine-Hospital Service, now engaged in the preparation of a monograph upon the mosquitoes of North and Central America and the West Indies.

The following suggestions as to collecting mosquitoes are offered for your guidance:

The collector should be provided with a number of small, widemouthed vials; an open-mouthed vial being placed over a mosquito found resting upon a surface, the finger is then placed over the mouth of the vial and a wad of cotton stuffed in. The mosquitoes can be killed by blowing tobacco smoke into the vial or by a drop of chloroform placed upon the cotton stopper. Specimens thus collected and

1761

killed should then be placed in a pill box, between two or more layers of cotton, and the memorandum, with all facts obtainable—such as approximate elevation above the sea, whether captured in house, outhouses, marshes, woods, fields, or on vessels—should be folded and placed under the cover of the box. A single box or series of boxes may then be packed in a small tin or wooden box and mailed under the franked envelope furnished for the purpose.

Your cooperation in this work is respectfully requested.

WALTER WYMAN,

Surgeon-General.

Approved:

ROBERT B. ARMSTRONG,

Assistant Secretary of the Treasury.

BLUE.

Inspection service, Mexican border—Precautions against yellow fever at Eagle Pass.

EAGLE PASS, Tex., September 30, 19 3.

Sir: I have the honor to inform you that this county and State are becoming much exercised over the yellow fever situation in Mexico.

The county officials requested the State to have all mail from Mexico fumigated before allowing same to enter the State. The State quarantine officer here was ordered by the State health officer, Doctor Tabor, to disinfect all mail. * * *

The whole of the quarantine work here practically devolves upon the Service, and I am on the go at all hours, answering questions and allaying fear.

A quarantine is to be established at Reata, Mexico, by the State of Coahuila (Mexico) against Monterey. This will be accomplished in a few days.

The Federal (Mexican) health officer at Ciudad Porfirio Diaz, Mexico, is boarding all trains coming into Diaz and inspecting same for suspicious cases, also taking note of persons arriving from infected localities, and giving me all of the information which he secures, thus making the quarantine here practically impossible to pass.

I also have a guard in Mexico to meet the incoming trains, who takes note of all persons arriving in Diaz. This guard then crosses the river to this side, reports what he has learned, and what the Mexican health officer (Doctor Carter) has to say.

In other words, all persons arriving in Diaz are spotted. I get their descriptions and turn them over to the guards on the bridges. Besides this, I know of every ticket sold at Monterey and other points on the Mexican International Railroad.

I am free to state that I think it impossible for anyone to get here without my knowledge.

Respectfully,

LEA HUME,

Acting Assistant Surgeon in Charge.

EAGLE PASS, Tex., October 8, 1903.

WYMAN, Washington:

Evidence accepted here by Service and State representative that passenger traffic is not from infected places in Mexico comprises statement under oath by passenger, corroborated by examination of railroad ticket, marks on baggage, and report of railroad officials. Reata, on Mexican International Railroad, in Coahuila State, is key to passenger traffic to Eagle Pass from infected localities in Mexico. Mexican quarantine authorities have established detention camp there. Will report as observations are completed. Address me care Hume.

LUMSDEN.

EAGLE PASS, TEX., October 12, 1903.

WYMAN, Washington:

Made practically house-to-house inspection Quemado; found 8 cases undoubted malaria; no indications yellow fever. River there now high, consequently very few attempt crossing from Mexico. Consider my remaining longer at Eagle Pass unnecessary. Hume is handling situation well.

LUMSDEN.

Washington, October 13, 1903.

LUMSDEN, Care HUME, Eagle Pass, Tex.:

Proceed immediately to El Paso and assume temporary charge of station. Alexander directed to report to you. Wertenbaker will remain a day or so to post you on situation.

WYMAN.

EAGLE PASS, Tex., October 13, 1903.

WYMAN, Washington:

Order received. Will depart to-morrow morning.

LUMSDEN.

Washington, October 13, 1903.

WERTENBAKER, Sheldon Hotel, El Paso, Tex.:

Lumsden ordered to El Paso to assume temporary charge of station. Alexander directed to report to him. Instruct Lumsden on all points mentioned in your correspondence.

WYMAN.

Yellow fever at Laredo and vicinity.

LAREDO, TEX., October 8, 1903.

WYMAN, Washington:

Usual continual run confirmed 20 cases. Doctor McKnight will recover.

MURRAY.

EL PASO, TEX., October 8, 1903.

WYMAN, Washington:

Arrived El Paso this morning. Address Shelden Hotel.

WERTENBAKER.

EL Paso, Tex., October 8, 1903.

WYMAN, Washington:

n

See my report this station last March for general conditions. Consular certificates and personal statements of passengers being accepted as to previous movements. * * * Recommend authority to nominate acting assistant to help Alexander and make careful inspection on train before reaching Juarez. Think no trouble to arrange such inspection. * * *

WERTENBAKER.

LAREDO, TEX., October 8, 1903.

WYMAN, Washington:

At Tabor's request have lent him additional camp outfit. A small camp is to be established on Texas-Mexican road.

GUITERAS.

LAREDO, TEX., October 8, 1903.

WYMAN, Washington:

New cases reported to-day, 25; deaths, 1; houses disinfected, 19, with 72 rooms. The situation is discouraging. Circumstances are such that it is impossible to make mosquito disinfection effective. Am pushing it, however, giving particular attention to oiling stagnant water in infected districts.

GUITERAS.

Washington, October 9, 1903.

Guiteras, Laredo, Tex.:

In spite of discouraging situation due to prevalence of fever before you took hold, Bureau approves your determination to continue in present efforts. Am informed that in eliminating yellow fever from Habana not only patients and suspects were screened, but general encouragement was given to citizens to protect themselves by netting. You must not expect results too soon.

WYMAN.

LAREDO, TEX., October 9, 1903.

WYMAN, Washington:

New cases reported to-day 29, deaths none, houses disinfected 18 with 70 rooms. Started with an oiling gang this morning, with the following results: Eighty-three premises inspected, covering 24 city blocks; oiled 126 water containers, 3 excavations, 6 wells, and 6 premises sprinkled. This is excellent work. Heretofore oiling has

been done by the disinfecting sections. Am convinced that cases are being reported that are not yellow fever. Unfortunately Murray can not see all the cases to determine diagnosis.

GUITERAS.

LAREDO, TEX., October 9, 1903.

WYMAN, Washington:

Confirmed 15, ruled out others; visited Consul Garrett at Nuevo Laredo last night and to-day.

MURRAY.

Washington, October 9, 1903.

Dr. J. H. Purnell, Vicksburg, Miss.:

Thanks for your valuable assistance and services, which terminated evening of the 8th.

WYMAN, Surgeon-General.

Washington, October 10, 1903.

Guiteras, Laredo, Tex.:

Hereafter with your daily report of cases wire minimum temperature during previous night and maximum shade temperature of day for which report is made.

WYMAN.

Washington, October 10, 1903.

Guiteras, Laredo, Tex.:

If possible make arrangements for daily report of cases and deaths at Nuevo Laredo to be wired here.

WYMAN.

LAREDO, TEX., October 10, 1903.

WYMAN, Washington:

New cases reported to-day, 20; deaths, 2; houses disinfected, 17, with 47 rooms; 182 containers, 2 wells, and excavations oiled; 9 premises sprinkled; 46 spigots put in water barrels; 110 premises inspected, covering 18 city blocks; temperature—maximum, 90°; minimum, 56°. Nuevo Laredo reports 7 new cases, 4 suspects, and 1 death. Reliable reports from Nuevo Laredo are difficult to obtain. Thanks for your encouraging telegram of last night.

GUITERAS.

Washington, October 10, 1903.

WERTENBAKER, Sheldon Hotel, El Paso, Tex.:

After completing duties assigned in two other telegrams this date, wire recommendations as to your return to New Orleans and await orders.

WYMAN.

Washington, October 10, 1903.

WERTENBAKER, Sheldon Hotel, El Paso, Tex.:

Submit nomination and place on duty acting assistant to Assistant Alexander, as per your telegram, at \$5 per day temporary. Have him report to Alexander.

WYMAN.

LAREDO, TEX., October 11, 1903.

WYMAN, Washington:

Nine confirmations, two undecided; many visits. Consul Garrett critically ill. Have seen him twice to-day and go again to-night.

Murray.

Laredo, Tex., October 11, 1903.

WYMAN, Washington:

New cases reported to-day, 18; deaths, 1; houses disinfected, 14, with 48 rooms; 138 containers and 8 wells oiled and 8 premises sprinkled; 34 spigots put in water barrels; 94 premises, covering 15 city blocks, inspected; maximum temperature, 91°; minimum, 64°. New Laredo reports 1 new case and 1 death; remaining on hand, 9 cases and 5 suspects, the report from New Laredo refers only to cases in hospital. Twenty-nine cases reported yesterday evening, Minera. Ordered Dinwiddie to Minera to screen and disinfect; all expenses borne by coal company. History of case posted yesterday near Encinal makes it probable that cause of death was not yellow fever.

GUITERAS.

Laredo, Tex., October 12, 1903.

WYMAN, Washington:

New cases to-day, 35; deaths, none; houses disinfected, 19, with 77 rooms; 204 containers, 5 wells, and 7 excavations oiled; 72 spigots put in water barrels; 147 premises, covering 13 city blocks, inspected; maximum temperature, 88°; minimum, 68°. Nuevo Laredo reported 7 new suspicious cases—no deaths. Dinwiddie returned to-day and reported about 50 new cases at Minera in the past forty-eight hours.

LAREDO, TEX., October 12, 1903.

WYMAN, Washington:

Confirmed 15 cases, many in previously infected houses.

MURRAY.

LOREDO, TEX., October 13, 1903.

WYMAN, Washington:

New cases to-day, 28; deaths, 4; the diagnoses in 2 of the new cases reported were not concurred in by Murray and myself. Twenty houses disinfected, with 82 rooms; 186 containers and 1 well oiled,

October 16, 1903 1768

premises sprinkled, and 143 inspected. Maximum temperature 87, minimum 54. Nuevo Laredo reports 5 new cases and 1 death.

GUITERAS.

LAREDO, TEX., October 14, 1903.

WYMAN, Washington:

New cases to-day, 27; deaths, 2; houses disinfected, 24, with 87 rooms; 199 containers and 2 excavations oiled, 26 premises sprinkled, 140 premises inspected. Twenty-six city blocks and intervening streets covered. Maximum temperature, 86; minimum, 53. New Laredo, 6 new cases, 1 death; no report from Minera.

GUITERAS.

Report of conditions existing in San Antonio, Tex., and vicinity with relation to preventing spread of yellow fever.

SAN ANTONIO, TEX., October 5, 1903.

Sir: I have the honor to submit a report of the conditions existing in and south of San Antonio, and of the work done up to the present time.

San Antonio was reached on the morning of October 2, 1903, and as soon as practicable I visited the local health authorities, and Doctor Nolte, of the Louisana State board of health, that I might acquaint myself with the situation as regards yellow fever and quarantines.

From the health authorities I learned that as soon as the first cases of fever had been announced in Laredo a quarantine was put on against passengers and baggage coming from that point, and officers met the incoming train and prevented passengers disembarking. Measures were also taken to prevent those who had gone north from coming back to the city until five days had expired since leaving the fever district, and as far as possible those who had come into the city were located and kept under observation. Besides quarantining Laredo, a quarantine was declared against those counties which had failed to close their doors against the infected center.

All counties are now quarantined. From a sanitary point of view San Antonio presents a better condition than most places of its size, and measures for its improvement are being prosecuted. The local board of health is composed of four physicians and the mayor ex officio. The physicians are Dr. D. Berry, president and county physician; Dr. S. Burg, city physician; Dr. E. F. Hertz Berg, and Dr. H. D. Barnitz, all intelligent, alert, and active gentlemen. They met me very courte-ously and promised to give all aid in their power, and have extended an invitation to me to be present at their meetings and to take part in them.

From Doctor Nolte I learned that there had been a few rumors relative to there being yellow fever in the city, but upon investigation it was found that they were without foundation. He further stated that he had attended a meeting of the local medical society on the evening of October 1, at which there were present fifty practitioners of the city, and upon inquiry it was established that none of them had seen any case that was at all suspicious. Up to the present time I am satisfied there has been no case of fever as far as is known outside of Laredo and the mines, the latter having had constant and intimate association with Laredo.

On October 3 I drove with Doctor Burg, the city physician, over the city, and, among other places, visited the city hospital. This institution accommodates about sixty beds, but at present there are only about thirty patients in its wards, and among these there were only three fever cases, and these plainly malarial. A room has been prepared here for the reception of actual or suspected yellow-fever cases. The windows and doors are protected by mosquito netting, and a low ceiling has been put in of the same material.

To revert a moment. On Friday evening I attended a meeting of the board of health, the proceedings of which a copy was mailed the Department on Saturday last. Sunday, October 4, I took the 9 o'clock train (only one train each way daily) and went to Cotulla, the first place of any importance after leaving Laredo coming north. Before reaching this place I had an opportunity for gaining a few items concerning Pearsall, the only other point of any importance on the International Great Northern R. R. between San Antonio and Laredo, the train having stopped there for half an hour awaiting the north bound. Inquiries made of the merchants elicited the fact that there was no sickness, and that no strangers were allowed within their gates. On reaching Cotulla the health officer, Dr. J. M. Williams, of Lasalle County, of which Cotulla is the county seat, was called on, and from him a correct understanding of the quarantine measures was obtained.

At Cotulla the Nueces River passes, dividing Lasalle County in two, running in a southeasterly direction, and there are only three places at which people can cross when it is swollen, as is now the case, with-

out swimming. There are two bridges for the public roads and one railroad bridge. At each of these crossings guards are placed, and no one is permitted to pass unless he can establish the fact that he has not been in the yellow-fever neighborhood. It is possible for one to get across the river by swimming, but very few would ever attempt it, and before they could reach their destination, dodging through the thick undergrowth, the five days would elapse and the danger would have passed. In the lower part of the county the little hamlet of Encinal is located. This is under Doctor Williams's jurisdiction.

There are two dirt roads entering the county here, both of which are strongly guarded. All of the contiguous counties have adopted the same measures that Lasalle has. Along the line of the International Great Northern road are a number of little hamlets, the best of which being a very small affair, peopled mostly—say fully two-thirds—by Mexicans. Each place has established its own quarantine, and positively refuses to permit anyone from the south to come in. No one comes in unless he bears the inevitable health certificate. A great number of the Americans left these towns for their ranches when the fever was first announced. In Cotulla, for instance, fully two-thirds of the white population either took the train for the north or went to the ranches.

On October 5 (this morning), not being able to enter any of the towns between Cotulla and this place, coming from the south, I returned to San Antonio, which is really the key to the situation. If no fever gets here, then there is no danger to the country north or east, providing, of course, that none has been already carried by the exodus from Laredo.

The country south is one of magnificent distances, the ranches being from 5 to 30 miles apart, and each one is a principality unto itself, with its own little shotgun quarantine. There is, of course, a little danger of the disease getting on some of the large ranches near Laredo, from the fact that quite a number of Mexicans come north at this season to pick cotton and some one might slip on a ranch and be hidden by his friends.

I reached San Antonio this afternoon and called on Dr. Berry, the president of the board of health. He reports everything quiet and no rumors of any kind.

Respectfully,

John H. Purnell, Acting Assistant Suryeon.

Statistical reports of States and cities of the United States—Yearly and monthly.

Georgia—Augusta.—Month of September, 1903. Estimated population, 42,441. Total number of deaths, 67—white 27, colored 40—including enteric fever 1, measles 1, and 2 from tuberculosis.

Columbus.—Month of September, 1903. Estimated population, 19,303—white, 10,276; colored, 9,027. Total number of deaths, 28, including 2 from tuberculosis.

Macon.—Month of September, 1903. Estimated population, 28,000—white, 15,000; colored, 13,000. Total number of deaths, 25—white 13, colored 12—including 4 from tuberculosis.

ILLINOIS—*Peoria*.—Month of September, 1903. United States census population of 1900, 56,100. Total number of deaths, 57, including diphtheria 5, enteric fever 1, and 9 from tuberculosis.

Rockford.—Month of September, 1903. Estimated population, 40,000. Total number of deaths, 31, including 3 from tuberculosis.

Iowa—Des Moines.—Month ended October 3, 1903. Estimated population, 80,000. Number of deaths, 48; no deaths from contagious diseases.

Dubuque.—Two weeks ended September 26, 1903. Estimated population, 40,000. Total number of deaths, 26. No deaths from contagious diseases.

Ottumwa.—Month of September, 1903. Estimated population, 22,000. Total number of deaths, 11, including 1 from enteric fever.

Maryland—Cumberland.—Month of September, 1903. Estimated population, 20,000. Total number of deaths, 37, including enteric fever 3, and 1 from tuberculosis.

Massachusetts—Newton.—Month of September, 1903. Estimated population, 37,794. Total number of deaths, 38, including enteric fever 1, and 3 from tuberculosis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended October 3, 1903, from 82 observers, indicate that pneumonia and erysipelas were more prevalent, and intermittent fever, maningitis, and remittent fever were less prevalent than in the preceding week.

Meningitis was reported present at 6 places, measles at 8, whooping cough at 13, smallpox at 34, diphtheria at 38, scarlet fever at 58, enteric fever at 93, and phthisis pulmonalis at 227 places.

MINNESOTA— Winona.—Month of September, 1903. Estimated population, 23,000. Total number of deaths, 23, including 3 from tuberculosis.

Montana—Helena.—Month of September, 1903. Estimated population, 13,000. No deaths reported.

New Hampshire—Concord.—Month of September, 1903. Estimated population, 20,000. Total number of deaths, 26, including 1 from tuberculosis.

Franklin.—Month of September, 1903. Estimated population, 6,000. Total number of deaths, 9, including enteric fever 1, and 1 from tuberculosis.

NEW YORK.—Reports to the State board of health, Albany, for the month of August, 1903, from 156 cities, towns, and villages having an

aggregate population of 7,910,000, show a total of 10,435 deaths, including diphtheria 157, enteric fever 141, measles 49, scarlet fever 50, whooping cough 82, and 1,025 from tuberculosis.

Peekskill.—Month of September, 1903. Estimated population, 14,000. Total number of deaths, 14, including 1 from tuberculosis.

Saratoga Springs.—Month of September, 1903. Estimated population, 12,119. Total number of deaths, 22, including diphtheria 2, enteric fever 2, and 2 from tuberculosis.

Oню—Cleveland.—Month of August, 1903. Estimated population, 420,000. Total number of deaths, 544, including diphtheria 12, enteric fever 42, and 38 from tuberculosis.

East Liverpool.—Month of August, 1903. Estimated population, 20,000. Total number of deaths, 16. No deaths from contagious diseases.

Month of September, 1903: Total number of deaths, 16, including enteric fever 2, and 1 from tuberculosis.

Pennsylvania—Columbia.—Month of September, 1903. Estimated population, 13,500. Total number of deaths, 21, including 3 from tuberculosis.

Dunmore.—Month of September, 1903. Estimated population, 15,000. Total number of deaths, 7.

UTAH—Ogden.—Month of September, 1903. Estimated population, 25,000. Total number of deaths, 12, including 1 from enteric fever.

Virginia—Lynchburg.—Month of September, 1903. Estimated population, 30,000. Total number of deaths, 26, including enteric fever 1, and 7 from tuberculosis.

Wisconsin—*Milwaukee*.—Month of August, 1903. Estimated population, 315,000. Total number of deaths, 327, including diphtheria 5, enteric fever 4, whooping cough 2, and 35 from tuberculosis.

FOREIGN AND INSULAR.

BRAZIL.

Reports from Bahia-Mortuary statistics.

Vice-Consul Rowe reports, September 7 and 14, 1903, as follows: During the week ended September 5, 1903, there were interred in the Bahia cemeteries 90 bodies.

The causes given for interment were the following: Alcoholism 1, arterio-sclerosis 1, asphyxia 1, beriberi 2, bronchitis 2, cerebral congestion 1, cirrhosis of liver 3, death by violence 1, diarrhea 3, diarrhea and enteritis 6, influenza 3, malarial fevers 8, nephritis 4, organic diseases of heart 6, puerperal eclampsia 1, pleurisy 1, pneumonia 4, pulmonary tuberculosis 8, senile debility 3, stillborn 4, other causes 27.

During the week ended September 12, 1903, there were interred in the Bahia cemeteries 82 bodies.

The causes given for interment were the following: Alcoholism 1, arterio sclerosis 4, asphyxia 1, bronchitis 1, cerebral congestion 2, erysipelas 1, gangrene 1, hepatitis 2, influenza 2, malarial fevers 1, meningitis 2, organic diseases of heart 3, pneumonia 2, pulmonary tuberculosis 8, rheumatism 1, senile debility 1, stillborn 4, syphilis 2, tetanus 1, tetanus neonatorum 2, other causes 29, diarrhea and enteritis 11.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Carson reports as follows for the week ending September 27, 1903: Present officially estimated population, 8,500; 4 deaths; prevailing disease, mild type of malarial fever; general sanitary condition of this port and the surrounding country during the week, good. The four deaths noted above occurred in this port; 2 adults, white, males, and 2 colored, males (1 an infant), due to, respectively, cerebral meningitis, chronic albuminuria and tetanus neonatorum.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disin- fected.

CHINA.

Report from Hongkong-Cholera in Shanghai and Amoy.

Passed Assistant Surgeon McMullin reports, September 3, 1903, as follows: Week ended August 29, 1903. Eight vessels, with 566 crew and 320 passengers (158 cabin and 162 steerage), were inspected and granted bills of health; 418 crew and 162 steerage passengers were bathed and 567 pieces of baggage disinfected. Only 3 fatal cases of plague were reported (Chinese), and 1 of cholera, for the week. Acting Assistant Surgeon Ransom reports that cholera has again appeared in Shanghai and that while it is not now epidemic it will probably increase, and several cases have occurred on board ships in the harbor. Cholera at Amoy is apparently decreasing, judging from the bills of health from that port. The case of cholera reported here for last week occurred in one of the adjacent districts and not in the city of Victoria, making a total of 8 cases reported since January 1. The first case of cholera this year occurred in May.

Report from Shanghai—Cholera present—Precautions taken to prevent spread.

SHANGHAI, CHINA, August 31, 1903.

Sir: I have the honor to forward herewith abstract of bills of health issued at this station during the week ended August 29, 1903. There were inspected during the week 5 vessels, 398 crew, 43 cabin and 145 steerage passengers. The quarters of the native crew of one vessel were disinfected with sulphur gas, and 83 men were bathed and their clothing disinfected. Two men were rejected on account of temperature. The number of pieces of freight viséd was 51,072.

The report of the municipal health officer for the week shows: Cholera, 1 case, 9 deaths; enteric fever, 1 case; dengue fever, 6 cases.

Total mortality, 4 foreigners and 296 natives.

The mortality among the natives has practically doubled in the last two weeks, and as cholera is present I have no doubt that a good deal of the increase is due to that disease, notwithstanding the fact that but few cases and deaths are officially reported. I have therefore imposed all the restrictions which were in force here last year, and inclose for the information of the Bureau a copy of the instructions issued to the various shipping firms, etc., in Shanghai.

I also inclose a copy of my letter relative to the visé of shipping orders, etc., to the quarantine officers at Manila, Honolulu, and such places in the United States as I thought particularly interested, for

their information.

Respectfully,

S. A. Ransom, Acting Assistant Surgeon.

The Surgeon-General.

[Inclosures.]

SHANGHAI, CHINA, August 17, 1903.

GENTLEMEN: Owing to the presence of cholera in Shanghai, I have to request that you notify the masters of the various vessels in which

you may be interested, sailing from this port to any port under the jurisdiction of the United States, that until further notice no fruit or vegetables whatsoever must be taken on board at Shanghai. A strict compliance with this requirement is necessary in order to avoid complications and delay to vessel at destination.

Respectfully,

d

S. A. Ransom, Acting Assistant Surgeon.

SHANGHAI, CHINA, August 31, 1903.

Gentlemen: In view of the spread of cholera in this port the restrictions regarding wool, feathers, skins, and bristles, viz, dry packing in naphthaline to the satisfaction of this office, in force here last season, will again be put into operation from and after this date and until further notice.

In this connection I would say that until otherwise advised it will be necessary to submit to this office for countersignature all shipping orders or boat notes for cargo emanating from or passing through Shanghai en route to United States ports, and in order to avoid detention at quarantine at destination the officers of vessels should be instructed not to receive on board any freight the boat note for which is not properly signed.

Respectfully,

S. A. Ransom, Acting Assistant Surgeon.

SHANGHAI, CHINA.

Gentlemen: Your particular attention is invited to the requirement of this Service that all vessels bound to an American port from Shanghai shall submit for disinfection, under the supervision of this office, the personal effects of all crew and steerage passengers shipped here and such effects of members of the crew as have been taken ashore during the stay of the vessel here.

You are also reminded that it is required that any vessel bound to an American port upon which any of the quarantinable diseases—viz, cholera, plague, smallpox, leprosy, typhus or yellow fever—have occurred shall herself be disinfected, under the supervision of this office, before bill of health can be granted.

You are respectfully requested to advise the masters of any vessels in which you may be interested that a very strict compliance with these requirements is necessary in order to avoid trouble and considerable delay to their vessels at destination.

Respectfully,

S. A. Ransom, Acting Assistant Surgeon.

COLOMBIA.

Report from Bocas del Toro, fruit port.

Acting Assistant Surgeon Osterhout reports as follows: Week ended September 29, 1903. Present officially estimated population not obtainable. Number of deaths from all causes, 5; prevailing diseases, malarial. The 5 deaths noted were due respectively to malarial fever,

4; inflammatory rheumatism, 1. General sanitary condition of this port and the surrounding country during the week good. In my opinion, the smallpox epidemic has been stamped out. The villages in the surrounding lagoons have been visited in a systematic manner; thorough vaccination of persons and disinfection of premises carried out.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	passengers	Number of passengers in transit.	Pieces of baggage disin- fected.
Sept. 23 25 27 27	Barnstable	32 19 23 18	0 0 0 0	0 0 0 0	000

COSTA RICA.

Report from Limon, fruit port.

Acting Assistant Surgeon Gruver reports as follows for the week ended October 1, 1903: Present officially estimated population, 4,000; number of cases and deaths from yellow fever during the week, cases 2, deaths 1; number of deaths from other causes during the week, 5. Prevailing diseases, yellow fever and malaria. General sanitary condition of this port and the surrounding country during the week, very poor.

Bills of health were issued to the following-named vessels:

CUBA.

Report from Cienfuegos.

Acting Assistant Surgeon McMahon reports October 6, 1903, as follows:

Mortuary report for the week ended September 26, 1903: Paludism 1, meningitis 1, enteritis 1, tuberculosis 2, tetanus 1, other causes 7, total for the week 13.

During the week ended October 3, 1903, there were two bills of health issued to vessels going to ports in the United States; one of these was in good sanitary condition and the other was unclean from the cargo of cattle that she brought to this port.

The sanitary condition of the city is not so good just now as it was some months past.

Report from Habana-Mortality statistics.

Assistant Surgeon Trotter, in temporary charge, reports, October 2, 1903, as follows:

Week ended September 26, 1903:	
Health certificates issued	169
Vessels inspected and issued bills of health	17
Crews of outgoing vessels inspected	678
Passengers of outgoing vessels inspected	334
Pieces of baggage inspected	187
Pieces of baggage disinfected	1
Pieces of express inspected	16
Pieces of freight inspected	

I inclose herewith the usual weekly mortuary report of the city of Habana.

Mortuary report of Habana for week ended September 26, 1903.

FRANCE.

Plague at Marseille.

Vice Consul General Victor H. Morgan reports, September 15, 1903, to the Department of State as follows:

I have the honor to confirm my cable message of the 13th instant, as follows:

SECRETARY OF STATE, Washington:

Nine cases, 1 death, pneumonia. Suspect now officially declared bubonic plague. Isolation complete. No extension past week. Health city excellent.

MORGAN.

Supplementing the foregoing, I have to say that early in the past week several cases of what was at first thought to be pneumonia occurred among the workmen employed in sorting a quantity of imported rags at a cardboard factory in one of the suburbs of Marseille. As plague symptoms were discovered, measures were at once taken to isolate the patients, who were placed in a special hospital outside the limits of the city, the other employees of the factory being also quarantined and kept under close surveillance. The factory itself was immediately subjected to a thorough disinfection, in the course of which it took fire and was destroyed.

I am advised this morning that 1 new case has occurred in the per-

son of a nurse at the plague hospital.

I have deemed it unnecessary to report the outbreak until the disease was officially declared to be bubonic plague. Thanks to the prompt measures taken by the authorities, the trouble has remained confined to the first cases (with the single exception above noted), and no symptoms have been observed among the other persons quarantined. These latter are about to be returned to their homes, which have all been carefully disinfected as a precautionary measure.

In view of these facts and of a sharp fall in the temperature, there is every reason to believe that the port is in no danger of an epidemic.

I propose, however, for the present to record the fact that plague exists, on all bills of health given to vessels leaving this place for United States ports.

End of plague at Marseille.

Vice Consul General Morgan reports, September 24, as follows: Referring to my dispatch No. 118, dated September 15, 1903, I have now the honor to confirm the following cable sent to the Department to-day:

SECRETARY OF STATE, Washington:

i see

Last case plague officially decred cured.

MORGAN.

I am this day advised by the prefect of this department that all the patients hitherto under treatment for plague in this city are now cured and that the disease no longer exists in the city or its environs. The isolated persons will be returned to their respective homes immediately on the expiration of the period required by law to elapse after the disinfection of the dwelling houses. The foregoing facts will be recorded on bills of health given to vessels departing from this port.

GERMANY.

Report from Berlin-Plague and cholera in various countries.

Consul-General Mason reports, September 25, 1903, as follows:

Plaque.

France.—According to an official statement dated September 14 there had occurred in the infected district of Marseille 14 cases of suspected plague among the employees of the paper factory. Up to the above-mentioned date 4 of the patients had died. The patients were treated in the Salvator Hospital, and in the same place the remainder of the workmen belonging to the factory were kept under medical supervision. During the night from the 9th to the 10th of September the factory was burned down. The disease is supposed to have been introduced through a shipment of rags in which dead rats were found.

Egypt.—Between the 5th and 11th of September there were registered in Egypt 11 fresh cases of plague (and 6 deaths), viz, 1 case and 1 death in Damiette, the remainder in Alexandria.

Hongkong.—During the period from the 1st to the 15th of August there were registered 22 cases of plague (with 20 deaths).

Mauritius.—During the period from the 3d of July to the 6th of August 44 cases of plague occurred on the island (with 32 deaths).

Chile.—Up to the 19th of August there had been registered in Iquique 156 cases of plague, of which 67 ended in death.

Cholera.

Turkey.—According to the official bulletins Nos. 25 and 26, of the 7th and 14th of September, there have been registered in Syria 237 and 136 fresh cases of cholera (and 200 and 117 deaths), respectively.

Death rate of Berlin compared with other cities.

I have the honor to report that the death rate of Berlin for the week ended September 12 was lower than it has been since the middle of July, amounting, calculated on the year, to 16 per thousand of the population, being thereby, however, considerably higher than for the corresponding week of last year, in which it amounted to 14 per thousand. Of the large German cities during this week only the following showed more favorable figures than Berlin, viz, Hamburg, Barmen, Frankfort-on-the-Main, Stuttgart, Hanover, and Charlottenburg (with 10.5). The death rate of Schoneberg (17 per thousand), Karlsruhe, Munich, Cologne, and Magdeburg was not much higher. On the other hand, the death rate of Breslau, Nuremburg, Leipzig, Dresden, and Stettin was considerably higher than the Berlin rate, the death rate of Vienna was somewhat higher than that of Berlin, while the rates of London and Paris were lower than the Berlin figure.

The decrease in the number of deaths was confined exclusively to children in the first year of life. The infant death rate fell from 7.2 per year and mille to 6 in the week under discussion, being lower than that of Munich and Hamburg and not even the half of the Breslau, Leipzig, and Nuremburg rate. Acute diseases of the respiratory organs showed again a slight increase, causing 42 deaths. Acute intestinal diseases showed a decrease, claiming 119 victims (as against 168 in the foregoing week). Phthisis pulmonalis caused 61 deaths, and 51 persons succumbed to cancer. There further occurred 2 deaths from scarlet fever, 2 deaths from diphtheria, 1 death from measles, 3 deaths from typhus, and 23 persons died by violence.

GUATEMALA.

Report from Livingston, fruit port.

Acting Assistant Surgeon R. H. Peters reports as follows for the week ended September 28, 1903: Present officially estimated population, about 3,500; prevailing diseases, malarial; general sanitary condition of this port and the surrounding country during the week, good. Bills of health were issued to the following vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage distn- fected.
Sept. 22 22	SperoAnselm.	17 41	0 2	0	0 11

The steamship Anselm cleared from Puerto Barrios,

HAWAIIAN ISLANDS.

Outgoing quarantine transactions at Honolulu and Hilo.

Chief Quarantine Officer Cofer reports as follows: Outgoing quarantine transactions at this port for the week ended September 26, 1903, were as follows:

Vessels inspected and bills of health issued	7
Vessels disinfected	4

Cabin passengers inspected	59
Steerage passengers inspected	29
Crew inspected	97
Pieces of steerage passengers' baggage disinfected and passed	45
Pieces of crew's baggage disinfected and passed	46
Hides and skins disinfected	. 694
Pieces of freight disinfected	9
Passengers and crew declined certification on account of fever	4
Outgoing quarantine transactions at Hilo, Hawaii, for the weeded September 19, 1903, were as follows:	reek
Steamers disinfected, then inspected and passed	
Cabin passengers inspected and passed	
Crew inspected and passed	40

Suspected case of plague taken from steamship Nippon Maru.

Pieces of baggage disinfected .

Passed Assistant Surgeon Cofer reports, September 29, 1903, as follows:

I have the honor to report the arrival here yesterday of the steamship Nippon Maru, from oriental ports, with a suspected case of pestis ambulans on board. The vessel was placed in quarantine, her cargo lightered, the sick man and the steerage passengers taken to the quarantine station, and the patient's quarters fumigated. The case will be given further study and the results cabled to Passed Assistant Surgeon Cumming at San Francisco, Cal., before the steamer's arrival at that port.

HONDURAS.

Report from Ceiba, fruit port.

Acting Assistant Surgeon Robertson reports as follows for the week ended October 3, 1903: Present officially estimated population, about 4,000. No deaths. Prevailing diseases, malarial. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.		Number of passengers in transit.	Pieces of baggage disin- fected.

JAPAN.

Report from Yokohama—Condition of plague—Plague rats found— Laborer working on steamship Doric may have had plague.

Assistant Surgeon Dunlop Moore reports, September 18, 1903, as follows:

For the week ended September 12, 1903, four vessels, having an aggregate personnel of 321 crew and 581 passengers, were inspected, 114 steerage passengers and 3 crew were bathed, and 171 pieces of baggage were disinfected.

During the above period 1 new case of plague, terminating fatally, was reported in Yokohama; also 5 cases of "doubtful plague" were reported, 2 of which died. It is evident that the plague situation is not improved. In the neighborhood of an infected focus 61 dead rats are said to have been discovered, in some of which the plague bacillus was demonstrated. Additional cases of doubtful pest have been reported since September 12, one of which occurred in the person of a laborer, said to have been engaged in loading the steamship *Doric*, which sailed from this port September 12 for San Francisco. This possible source of infection, viz, through shore laborers working on vessels, is difficult to obviate.

Press reports under date of September 18 state that during the present year there had occurred in all Japan 28 cases of cholera with 16 deaths. At present this office has no knowledge of any true cases of cholera existing in Japan, though cholerine of a fatal type is reported in Kobe.

MAURITIUS.

Report on plague.

Passed Assistant Surgeon Eager reports from Geneva, Switzerland, September 29, 1903, as follows:

According to telegrams from the governor of Mauritius there were on that island during the week ending September 10, 1903, 23 cases of bubonic plague, 17 fatal, and during the week ending September 17, 1903, 39 cases and 28 deaths.

MEXICO.

The castor-oil plant as a protection against mosquitoes.

Consul Thompson reports from Progreso to the Department of

State September 17, 1903, as follows:

In a recent edition of the New York Herald appears an item to the effect that the Department of Agriculture is seeking for a plant "noxious to mosquitoes." If this be a fact any data bearing upon this subject should not be amiss. I would suggest that the Department investigate the properties of the castor-oil plant. The belief is current among the natives of Yucatan that a few castor-oil plants growing in or near a dwelling will protect the inmates from mosquitoes and certain other noxious insects peculiar to Yucatan. This belief has been to a certain extent confirmed by an experiment made by me personally. My dwelling at one time seemed to be peculiarly acceptable to mosquitoes. I planted a row of castor-oil plants around the courtyard and in a short time the mosquito was rare as he was formerly a frequent visitor. My plants were destroyed by the cyclone, and now the mosquitoes are as abundant as formerly.

These facts may be simply coincidences, but at least they are of value as facts to be proven or disproven. The plants are quickgrowing and beautiful either as interior decorations or hot-house

specimens. If seeds are desired I will furnish them.

Report from Tampico—Inspection of vessels—Yellow fever and small-pox—Increase in number of mosquitoes—Yellow fever at Monterey.

Temporary Acting Assistant Surgeon Lippincott reports, September 28, as follows:

Week ended September 26, 1903-

Bills of health issued	3
Vessels inspected and passed	2
Vessels disinfected and passed	1
Personnel of crew	148
Passengers	
Baggage nieces	11

During the week there were 27 deaths from all causes, of which 4 were from yellow fever, 1 from smallpox, 3 from tuberculosis, and 17 from noncontagious causes. There were 13 new cases of yellow fever officially reported and two left from the previous week, making a total of 15 cases for the week ended September 26, 1903.

On the 22d Doctor Frick removed a sailor from steamship *Dorisbrook*, with temperature 39°; proved malaria, and is still under treat-

ment at the City Hospital.

A sharp increase in the yellow fever prevalence over last week will be noticed. The recent rains have increased the stegomyiæ, which had almost disappeared. During the epidemic the small town of Pueblo Viejo, on the Veracruz side of the Panuco River, and at a distance of about 2½ miles from Tampico, was entirely free from infection until within five days past, due, I believe, to the fact that the strong southeast trade winds prevailing during the summer months had not allowed the stegomyiæ to fly in that direction, and now the September calms

have come on the mosquito has found his way over and infected the town.

I have been informed that the infection has passed quarantine at Linares, and that Monterey has now become infected.

Report from Vera Cruz—Yellow-fever statistics—A case on the British steamship Kassala.

Assistant Surgeon Goldberger reports, September 28 and October 5, 1903, as follows:

During the week ended September 26, 1903, there were officially reported 49 cases and 16 deaths from yellow fever.

The British steamer *Kassala* was partially fumigated by the Mexican authorities prior to her sailing for Mobile, one of the crew having developed yellow fever, which was probably contracted ashore.

During the week ended October 3, 1903, there were officially reported 45 cases and 9 deaths from yellow fever. During the month of September there were reported in all 190 cases and 58 deaths from this disease, which, compared with 249 cases and 84 deaths recorded in August, shows a decided improvement. This improvement will be better appreciated when it is remembered that, because of the sanitary campaign initiated the 1st of September under the direction of Dr. Narcise del Rio, many cases which before would have been unnoted were since that date unearthed and recorded by the sanitary agents under his direction.

NEW SOUTH WALES.

No plague rats found since August 15, 1903.

Department of Public Health, Sydney, New South Wales, September 7, 1903.

Sir: Referring to your communication of the 5th instant stating that the port health officer at San Francisco had received information of existence of plague rats at Sydney, Brisbane, and Fremantle, I have the honor, by direction, to inform you in reply that vessels from Western Australia and Queensland are admitted without any special inspection with reference to plague at this port, those States having been recognized as clean by us from August 8 last.

2. As regards Sydney, I am to say that rats to a weekly number of about 500 have been examined in the departmental laboratories since May 12 last, on which date a plague rat was found; that a moderate number were found infected during subsequent early weeks following the date mentioned, and that no plague rat has been found since August 15 last.

I have the honor to be, sir, your obedient servant,

G. H. King, Secretary.

The Manager Oceanic Steamship Company, Bridge street, Sydney.

PHILIPPINE ISLANDS.

Report of cholera in the provincial towns of the Philippine Islands, and of cholera, smallpox, and plague in the city of Manila.

Manila, P. I., September 3, 1903.

SIR: I have the honor to transmit herewith report of cholera in the Philippine Islands during the week ended August 29, 1903.

During the same period cholera, smallpox, and plague were reported in the city of Manila as follows:

	Cases.	Deaths.
Cholera Smallpox	19	19
Plague	2	i

Respectfully,

VICTOR G. HEISER,

Assistant Surgeon, Chief Quarantine Officer for the Philippine Islands.

The Surgeon-General.

VENEZUELA.

Yellow fever reported at Caracas.

Consul Goldschmidt, at La Guaira, reports, September 19, 1903, to the Department of State, as follows:

According to information received yesterday from Caracas, yellow fever has again made its appearance in that city, and that one death had occurred from said disease there on the 15th instant.

Owing to the close proximity of Caracas to this port and the frequent traffic between these two points it behooves us to take measures to prevent the introduction of the disease into Porto Rico.

As the steamships of the Red D Line (which touch at Porto Rico) now transfer passengers from these ports in Curaçao, we have, in a measure, lost control over said passengers, and I believe that our health authorities in Porto Rico should be informed of these facts, so that they may take proper precautions.

To this effect I shall also this day write a letter to the chief health officer in San Juan.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

Africa—Lourenço Marquez.—Month of July, 1903. Estimated population, 7,000. Total number of deaths, 54, including 12 from tuberculosis.

Bahamas—Dunmore Town.—Two weeks ended September 25, 1903. Estimated population, 1,232. No deaths reported.

Governors Harbor.—Two weeks ended September 26, 1903. Estimated population, 1,500. No deaths reported.

Green Turtle Cay Abaco.—Two weeks ended September 23, 1903. Estimated population, 3,314. No deaths reported.

Nassau.—Two weeks ended September 29, 1903. Estimated population, 12,390 No deaths reported.

Canada—Quebec—Sherbrooke.—Month of September, 1903. Estimated population, 12,000. Total number of deaths, 23, including diphtheria 1 and 1 from enteric fever.

Danish West Indies—St. Thomas.—Week ended August 28, 1903. Estimated population, 11,012. Total number of deaths, 7. Week

ended September 11, 1903. Estimated population, 11,012. Total number of deaths, 6.

France—Marseille.—Month of August, 1903. Estimated population, 491,161. Total number of deaths, 927, including diphtheria 3, enteric fever 16, measles 13, scarlet fever 1, and 11 from smallpox.

Rouen.—Month of August, 1903. Estimated population, 116,316. Total number of deaths 287, including diphtheria 1, enteric fever 3, measles 2, scarlet fever 1, whooping cough 1, and 50 from tuberculosis.

St. Etienne.—Four weeks ended September 15, 1903. Estimated population, 146,671. Total number of deaths 245, including diphtheria, 1, enteric fever 5, whooping cough 1, and 23 from tuberculosis.

GERMANY—Crefeld.—Month of August, 1903. Estimated population, 110,389. Total number of deaths 132.

Hanover.—Month of July, 1903. Estimated population, 248,501. Total number of deaths, 372. Seventy deaths from infectious diseases were reported.

GIBRALTAR.—Three weeks ended September 13, 1903. Estimated population, 27,460. Total number of deaths, 21.

Great Britain—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended September 19, 1903, correspond to an annual rate of 16.5 per 1,000 and during the week ended September 26, 1903, correspond to an annual rate of 16.3 per 1,000 of the aggregate population, which is estimated at 15,075,011.

Bradford.—Fortnight ended September 12, 1903. Estimated population, 281,770. Total number of deaths, 160, including enteric fever 1, scarlet fever 3, whooping cough 1, smallpox 1, and 11 from phthisis pulmonalis.

London.—One thousand four hundred and two deaths were registered during the week, including measles 13, scarlet fever 3, diphtheria 9, whooping cough 20, enteric fever 5, and diarrhea 217. The deaths from all causes correspond to an annual rate of 15.8 per 1,000. In Greater London 1,998 deaths were registered. In the "outer ring" the deaths included 6 from diphtheria, 2 from scarlet fever, and 2 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended September 19, 1903, in the 21 principal town districts of Ireland was 18.3 per 1,000 of the population, which is estimated at 1,093,289. The lowest rate was recorded in Armagh, viz, 0, and the highest in Galway, viz, 42.7 per 1,000. In Dublin and suburbs 146 deaths were registered, including diphtheria 1, enteric fever 3, measles 1, scarlet fever 1, whooping cough 6, and 33 from tuberculosis.

London.—One thousand three hundred and sixty-five deaths were registered during the week, including measles 11, scarlet fever 8, diph-

theria 8, whooping cough 12, enteric fever 10, smallpox 1, and diarrhea 139. The deaths from all causes correspond to an annual rate of 15.4 per 1,000. In Greater London 1,865 deaths were registered. In the "outer ring" the deaths include 4 from diphtheria, 1 from scarlet fever, and 5 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended September 26, 1903, in the 21 principal town districts of Ireland was 18.2 per 1,000 of the population, which is estimated at 1,093,289. The lowest rate was recorded in Kilkenny and Tralee, viz, 0, and the highest in Dundalk, viz, 43.9 per 1,000. In Dublin and suburbs 165 deaths were registered, including diphtheria 1, enteric fever 1, and 34 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended September 26, 1903, correspond to an annual rate of 16.8 per 1,000 of the population, which is estimated at 1,702,912. The lowest rate of mortality was recorded in Greenock, viz, 12, and the highest in Dundee and Aberdeen, viz, 20.1 per 1,000. The aggregate number of deaths registered from all causes was 550, including diphtheria 8, measles 5, scarlet fever 4, and 9 from whooping cough.

GUIANA—Demerara.—Period from August 1 to August 29, 1903. Population 86,250. Total number of deaths 238, including diphtheria 1, smallpox 1, and 39 from tuberculosis.

Paramaribo.—Month of August, 1903. Estimated population, 32,263. Total number of deaths, 81.

ITALY—Milan.—Month of July, 1903. Estimated population, 509,504. Total number of deaths 848, including diphtheria 13, enteric fever 25, measles 13, and 1 from scarlet fever.

Jamaica.—Two weeks ended September 12, 1903: Estimated population, 755,730. Number of deaths not reported. Week ended September 26, 1903: Estimated population, 755,730. Number of deaths not reported.

JAVA—Batavia.—Month ended August 22, 1903. Estimated population, 150,000. Number of deaths not reported.

Malta.—Week ended September 19, 1903. Estimated population, 193,315. Total number of deaths, 91, including 3 from enteric fever.

Spain—Barcelona.—Two weeks ended September 12, 1903. Estimated population, 600,000. Number of deaths not reported. Fourteen deaths from enteric fever, and 8 from smallpox reported.

Switzerland.—Reports for the fortnight ended August 22, 1903, from 18 cities and towns, having an aggregate estimated population of 790,000, show a total of 442 deaths, including diphtheria 1, enteric fever 1, measles 2, scarlet fever 3, and 45 from phthisis pulmonalis.

Cholera, yellow fever, plague, and smallpox, June 27, 1903, to October 16, 1903.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from United States consuls through the Department of State and from other sources.]

[For reports received from December 27, 1902, to June 26, 1903, see Public Health Reports for June 26, 1903.]
